Website Hosting Suggestion

Hostinger

Hostinger delivers fast, secure, and user-friendly managed web hosting services with excellent uptime. A generous list of hosting features and free extras make Hostinger's offer one of the best on the market.

Ionos

The entry-level **Essential** plan offers 10 GB of storage, 10 databases, a free domain for the first year, and daily backups for one website. As for security, one free wildcard SSL certificate, a site scan, and DDoS protection are included to safeguard you from various threats.

Result

The best one to choose is Hostinger, as it is classified as the best hosting-system website and the cheapest, also it has the best servers along with unlimited data storage to be used.

Issues

Impact issues

The website might cause problem to the organization and payment of contracts.

Also it can cause workers to quit and leave due to less work needed.

Ethical and Professional Issues

The company will require less workers, which will cause the less cost of salaries.

Also the creation of contracts will be simpler.

Also Less effort will be needed to make buildings and share information.
